

Sustainability is a lifestyle

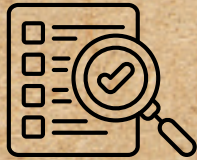

Introduction

Shubhangay Exim Private Limited was incorporated in Ahmedabad, Gujarat, India, with the motive of exporting a diverse range of organic and conventional food products. The operations involve procuring, packaging and exporting finest spices, herbs, beans, peas, pulses, millets, frozen foods, dry fruits and more.

The company was founded by Mr. Pragnesh Shah and Mr. Parshva Shah, with a vision to work towards the betterment of the farming community and other agrarian societies by connecting with them directly and showcasing their products on a global scale.

We're proud to source our products from local farmers & harvesters by joining forces with institutions like NAFED. SEPL is collaborating with NAFED in opening up retail stores across India to provide quality food at the lowest rates in primarily in and around rural areas. After the successful launch of the initial store in Gujarat, and receiving an overwhelmingly positive feedback from the community, we plan on opening 250+ stores offering all types of grocery products.

OVERVIEW

Aiming to be India's leading exporter for conventional and organic food products, SEPL is committed to transforming the dietary habits of the entire population by offering them quality food products that nourish the mind, body and soul. We aim to bridge the gap between tradition methods and technology to create a sustainable food system that benefits people and the planet.

VISION

Our vision is to create a world where sustainable agriculture practices and nutrition are deeply ingrained in our culture and where food choices are responsible and wholesome. Through our nutritional research and diet formulations, we strive to provide pure and safe food products that promote holistic development.

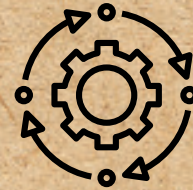

MISSION

Our mission is to build an environmentally conscious community for promoting Indian agriculture where the motive is to provide best & wholesome food to the entire population. We are committed to sourcing, processing, packaging and exporting organic and conventional food products that are free of harmful chemicals, artificial flavours and preservatives. We believe that everyone should have access to healthy and nutritious food and we work towards achieving this goal through our products and services. We also strive to grow our network to expand our pre-existing global presence.

PROCUREMENT

We source our raw materials from farmers who use sustainable agricultural practices and do not harm the environment. We ensure that our suppliers meet the highest standards of quality, consistency and traceability.

PROCESSING

We process our organic & natural crops as minimally as possible to retain their nutritional value and natural flavors. We follow strict guidelines and regulations to prevent contamination from non-organic materials. Our products are free of GMOs, artificial colors and preservatives.

PACKAGING

We believe that sustainable packaging is a critical component of our commitment to the environment. We use eco-friendly materials that are easy to recycle, biodegradable and compostable. Our packaging solutions are designed to reduce product damage, cut carbon footprints and save costs.

EXPORT

Our organic & natural food products are exported worldwide and we take pride in delivering the best quality products to our customers. We ensure that our products meet all international food safety and quality standards and we are committed to transparency and traceability throughout our supply chain. At SEPL, we believe that sustainability is not just a buzzword, but a way of life. We are committed to creating a better future for ourselves and for generations to come, one product at a time.

Our Brands

Harmony with Mother Nature

in'grano[®] Philosophy

in•grano

Pronounced as ingraano, the word INGRANO stands for Indian Grain or InGrain

Our expertise embraces the following attributes:

Premium Quality We ensure premium quality for all our products.

Cost-effective We're proud to provide our products at the lowest possible rates when compared with our competitors.

Sustainable Practices All our organic and conventional products are freshly procured and packed using sustainable practices.

Presence We have established ourselves around the globe, by leveraging our resources to expand our pre-existing global network.

100% CERTIFIED ORGANIC AND CONVENTIONAL PRODUCTS

Ingrano, Ingrano Plus and Ingrano Origins are three brands by SEPL. Starting with North America, we plan on having our brands available in stores worldwide.

INGRANO

With our extensive range of conventional agriculture and grocery products, we aim on promoting Indian agriculture and consumption of healthy food products worldwide. We have a variety of pulses, whole spices, spice powders, dry fruits, millets, frozen foods and much more.

INGRANO PLUS

One of the major facets of our company is our wide range of Organic agriculture and grocery products.

INGRANO ORIGINS

Bringing your city's favourite delicacies anywhere in the world with Ingrano Origins.

WHY CHOOSE US?

Choosing your food & grocery products wisely is a sensible option for both personal health and the environment. At Ingrano, we step back from exploiting the goodness of nature and provide sustainable products that are healthy and ecologically responsible.

100% ORGANIC PRODUCTS

Our organic products are characterized by their high quality and nutrition, contributing to preventive well-being and nourishment. They are free from fertilizers, pesticides, animal drugs and food additives. Our products are lab tested and properly certified by the national authorities.

MEETING GLOBAL STANDARDS

All our agricultural organic products confirm to the norms of India Organic, Jaivik Bharat, USDA Organic, SGS Organic and FSSAI. These standards do not permit the use of toxic chemicals in agriculture.

EXPERTISE

We command total control over our entire supply chain, from logistics to transport & warehousing facilities. Our process chain caters to organic and natural products from around the world, ensuring the quality and quantity of products. We also have cold storage facilities and we maintain a cold chain for our highly perishable products. Our state-of-the-art facility and technical expertise allow us to manufacture various derivatives of organic products. Our climate-controlled storage system preserves freshness and plant nutrients.
